- 25X1A 1. ☐ Comment. The shipments dispatched to Cottbus definitely consisted of Yak-11s or MiG-15s consigned to the VPL. It is believed that the shipments dispatched to Dresden-Klotzsche were earmarked for a Soviet Air Force training unit stationed there. It is believed that the four reporting sources partly observed the same shipments. The point could not definitely be clarified, because shipment record numbers were not mentioned. See also ☐
